(c) the details of financial assistance and other facilities provided to Karnataka to reduce the infant mortality rate?

THE MINISTER OF HEALTH AND FAMILY WELFARE (DR. C.P. THAKUR): (a) As per the Sample Registration System, the Infant Mortality Rate in Karnataka during 1999 was estimated to be 58 per 1000 live births.

- (b) Under the Reproductive and Child Health Programme, interventions for reducing infant mortality are under implementation. These include immunization against six vaccine preventable diseases, facilities for appropriate management of acute respiratory infection and diarrhoeal diseases and provision of essential newborn care. Promotion of exclusive breastfeeding and appropriate complementary feeding and prophylaxis against vitamin-A deficiency and iron deficiency is also being implemented for improving the nutritional status of children.
- (c) The year-wise details of assistance to Karnataka which include assistance for child health related interventions under the Reproductive and Child Health Programme are given in the table below:
